Notes:

1. Basic earnings per equity share are computed in accordance with NAS 33 Earnings per Share. Basic earnings per equity share are computed by dividing net profit after tax by the weighted average number of equity shares outstanding during the year. Bonus shares, also known as scrip dividends, involve the issue of shares without any consideration. Since the bonus shares do not change the resources available to the entity to earn a return for the shareholders (as in the case of shares issued for cash), the effect of change in number of shares in the EPS calculation is cancelled for the year in which bonus issue takes place and as well as for prior periods presented.
2. ROA and ROE has been calculated on average of assets and equity respectively of last and current fiscal year end.
3. The Investment includes investment in subsidiaries also.
